## FIRE & WEATHER DATA

[Home](#)

[State Data](#)

[Formats](#)

[KMZ](#)

[Zip Files](#)

April 4, 2012

Fire occurrence data has been updated with 2011 data. See [State Data](#).

Updated [KMZ](#) files are now available for BIA, BOR, BLM, and NPS.

**January 13, 2012**

Weather station and observations data have been updated with 2011 data.

**July 8, 2010**

The weather files are now in the .fw9 format. This format contains the Wet Fuels Flag used in the Nelson Models. T

**FireFamily Plus 4 is officially released**

For more information visit by [firemodels.org](http://firemodels.org).

FPL files will no longer be available for DOI agencies. Please call the Fire Applications Helpdesk for assistance (1-8

The intent of this site is to provide US Federal wildland fire managers with ready access to historical data which wil

Fire We

The weather information menu provides options to define data extraction criteria, N  
by state.

Future additions to this menu are anticipated to accomodate the direct entry of fire  
intervention.

# CLICK STATION INFORMATION

The screenshot shows the KCFast website interface. On the left is a light orange sidebar menu with the following items: [KCFast Main Menu](#), [Weather](#), [Data Extract](#), **Station Catalog**, [Station Information](#), [Other Sources](#), [Fire](#), [Products](#), [Anonymous FTP site](#), and [About KCFast](#). The main content area has a dark gray background. At the top right, it says *KCFast - K*. Below this, there is a horizontal line and the word **Fire**. A text block in the center reads: "The weather information, 'Station Catalog' submenu provides options to de county, or define an ad-hoc data download with more robust query option". A large brown arrow points from this text block to the [Station Information](#) link in the sidebar.

# RIGHT CLICK ON THE CATALOG .TXT FILE AND SELECT “SAVE TARGET AS”

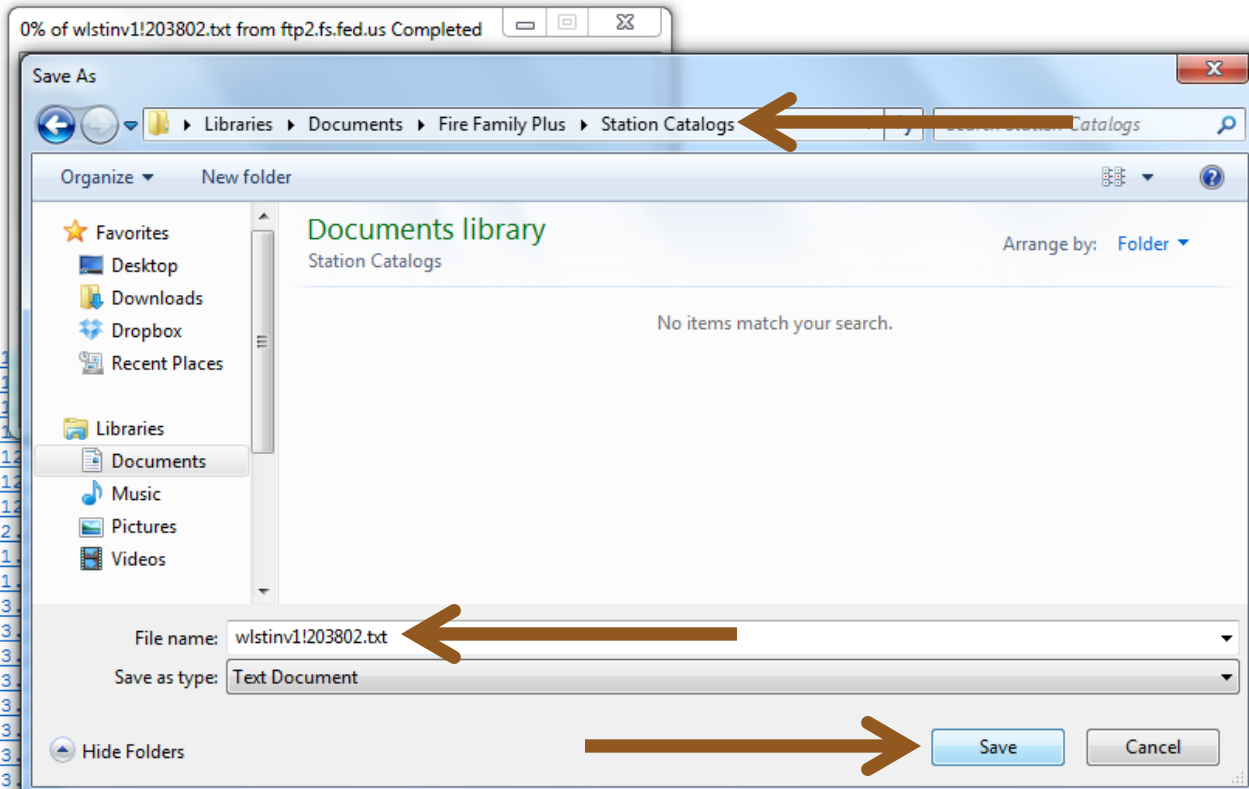

The screenshot shows an FTP directory listing for the path `/incoming/wo_fam/` at `ftp2.fs.fed.us`. The listing contains columns for dates, times, file sizes, and file names. A right-click context menu is open over the file `wlstinv1!203802.txt`, which is highlighted with a yellow box. The menu options include 'Open', 'Open in New Tab', 'Open in New Window', 'Save Target As...', 'Print Target', 'Cut', 'Copy', and 'Copy Shortcut'. Two brown arrows point to the 'Save Target As...' option: one from the right and one from the bottom right.

About KCFAST

Click “Standard Extract”

*KCFAST*

The occurrence menu provides options to define data extracted from the Shared Applications Computer System (SACS), combining range, and geographic area or administrative unit designation.

Future additions to this menu are anticipated to accommodate intervention.

# MAKE FIRE OCCURRENCE SELECTIONS

## Fire Occurrence Data Extraction

Region/Forest: 0914

Enter Region and Forest Number

rest in a RRFF format, such as "0408", for Region 4/Forest 8. Remember to enter leading zeros; for example, enter "0408", not "48". You may also enter a single digit, such as "04", in which case data for all forests in the region will be retrieved.)

Date Range:

Begin Year: 1975 End Year: 2013

Enter Year Range

(Please enter the years in YYYY format.)

Report Choice:

NFMAS - PCHA (PC Historical Analysis) ☒  
NFMAS - FPL ("Obsolete" Short Format) ☐  
GIS Data List For Selected Fires ☐

Select "PCHA" File Type

Raw Datafile ☒ or FPL ☐

Select "RAW" File Type

Raw datafiles will be sent to your designated FTP site.

If requesting raw datafiles, please indicate if you wish to receive an email notification when data is available.

Send email ☐ Do not send email ☒

Click "Submit"

Submit

Reset
